Communicating Research (Library and Information Science Series) (Library and Information Science) (Library and Information Science) (Library and Information Science (Hardcover)) A. J. Meadows

This text explores how changing technologies affect academic research practices. It begins with the rise of electronic media and fundamental changes in the dissemination of research. It then outlines the problems and concerns of researchers, librarians and publishers: inadequacies of copyright laws, the rise of inter-library loan practices and the unchecked broadcast of working papers. These problems lead to a discussion of research practices across scholarly disciplines and an investigation of the biases and intentions of practitioners. The book includes historical data and observations on the scene in order to make predictions about the future.
