Perspectives on Environmental Management and Technology in Asian River Basins (SpringerBriefs in Geography)

Asian river basins are undergoing rapid transformation. This volume considers the implications of the environmental change-development nexus for water management, river health and hazard awareness. As Biswas and Tortajada (2011) have recently commented, water management in Asia will likely change more in the next twenty years than in the last 2000 years. Critical environmental trends include decreasing flows of water and sediment due to dam construction and increased water extraction, land use change (especially forest removal), encroachment and degradation of floodplain and wetland environments, increased water demand and concerns about water security, urban expansion and associated pollution of rivers and contamination of groundwater reserves. These challenges are being reframed by new approaches to water management which represent a transition from engineering-dominated approaches towards integrated water management, from technology transfer to adaptive technologies. The volume comprises an introduction and five chapters. Brierley and Callum reframe approaches to river repair within emerging theories of in ecology and earth science which regard nature as a complex adaptive system replete with inherent uncertainties. These ideas are mirrored in the four case study chapters which deal with water governance in the Mekong Basin (Hirsch); hybrid adoption of water resource technologies in India (Barbanente et al.); determination of sediment dynamics in Java Rijnveld; and ecological conservation imperatives in the headwaters of the Yellow, Yangtze and Mekong rivers in western China (Li et al.).

From reader reviews:

Darrell Fowler:

Book is actually written, printed, or outlined for everything. You can recognize everything you want by a guide. Book has a different type. To be sure that book is important issue to bring us around the world. Close to that you can your reading proficiency was fluently. A guide Perspectives on Environmental Management and Technology in Asian River Basins (SpringerBriefs in Geography) will make you to always be smarter. You can feel a lot more confidence if you can know about everything. But some of you think in which open or reading a book make you bored. It is far from make you fun. Why they may be thought like that? Have you seeking best book or acceptable book with you?

Randell Easley:

A lot of people always spent their particular free time to vacation or maybe go to the outside with them friends and family or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity here is look different you can read some sort of book. It is really fun in your case. If you enjoy the book that you just read you can spent all day long to reading a reserve. The book Perspectives on Environmental Management and Technology in Asian River Basins (SpringerBriefs in Geography) it is quite good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. If you did not have enough space to deliver this book you can buy the e-book. You can more easily to read this book from your smart phone. The price is not to fund but this book provides high quality.

James Collins:

Your reading 6th sense will not betray you actually, why because this Perspectives on Environmental Management and Technology in Asian River Basins (SpringerBriefs in Geography) reserve written by well-known writer who knows well how to make book that may be understand by anyone who also read the book. Written within good manner for you, dripping every ideas and composing skill only for eliminate your current hunger then you still uncertainty Perspectives on Environmental Management and Technology in Asian River Basins (SpringerBriefs in Geography) as good book but not only by the cover but also by content. This is one reserve that can break don't ascertain book by its include, so do you still needing another sixth sense to pick this specific!? Oh come on your looking at sixth sense already told you so why you have to listening to an additional sixth sense.

Alta Favors:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library as well as to make summary for some book, they are complained. Just little students that has reading's heart and soul or real their hobby. They just do what the teacher want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that reading is not important, boring as well as can't see

colorful images on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Perspectives on Environmental Management and Technology in Asian River Basins (SpringerBriefs in Geography) can make you truly feel more interested to read.
