Physics for Scientists and Engineers, International Version Paul A. Tipler

Paul Tipler's textbook is the standard for calculus-based introductory physics courses taken by science and engineering students. Now in its fourth edition, the work has been extensively revised, with entirely new artwork, updated examples and new pedagogical features. An interactive CD-ROM with worked examples is included. Alternatively, the material on from the CD-ROM can be down-loaded from a website (see supplements section). Twentieth-century developments such as quantum mechanics are introduced early on, so that students can appreciate their importance and see how they fit into the bigger picture.
