**Atlas of Staging in Gynecological Cancer** J. Richard Smith, Jeremiah Healy, Giuseppe Del Priore  
'Atlas of Staging in Gynecological Cancer' is designed to be used in conjunction with diagnostic procedures between the surgeon and the radiologist. It describes the two common staging regimes used by all units across the world, namely, the FIGO staging system and the TNM system. The 'landscape' format allows each chapter to open on the left hand side and read across the double spread, enabling the reader to see both staging systems at once. Each chapter has a separate section on Epidemiology, Diagnosis, with radiological plates, Management, in tabular form, and Key Points. The book takes the reader through each gynaecologic cancer with a short text accompanying clear radiographic images with legends. Staging is also shown in pictorial form in order to aid clarity. The book will be of particular interest to the multi-disciplinary team who looks after this group of patients namely, clinical and radiation oncologists, surgeons, pathologists, radiologists and specialist nurses, all with their respective trainees.
