## Protein Surface Recognition: Approaches for Drug Discovery

A new perspective on the design of molecular therapeutics is emerging. This new strategy emphasizes the rational complementation of functionality along extended patches of a protein surface with the aim of inhibiting protein/protein interactions. The successful development of compounds able to inhibit these interactions offers a unique chance to selectively intervene in a large number of key cellular processes related to human disease.

*Protein Surface Recognition* presents a detailed treatment of this strategy, with topics including:

- an extended survey of protein-protein interactions that are key players in human disease and biology and the potential for therapeutics derived from this new perspective
- the fundamental physical issues that surround protein-protein interactions that must be considered when designing ligands for protein surfaces
- examples of protein surface-small molecule interactions, including treatments of protein-natural product interactions, protein-interface peptides, and rational approaches to protein surface recognition from model to biological systems
- a survey of techniques that will be integral to the discovery of new small molecule protein surface binders, from high throughput synthesis and screening techniques to *in silico* and *in vitro* methods for the discovery of novel protein ligands.

*Protein Surface Recognition* provides an intellectual “tool-kit” for investigators in medicinal and bioorganic chemistry looking to exploit this emerging paradigm in drug discovery.

### From reader reviews:

#### **Kathy Natal:**

Why don't make it to be your habit? Right now, try to ready your time to do the important behave, like looking for your favorite guide and reading a publication. Beside you can solve your condition; you can add your knowledge by the reserve entitled Protein Surface Recognition: Approaches for Drug Discovery. Try to stumble through book Protein Surface Recognition: Approaches for Drug Discovery as your buddy. It means that it can being your friend when you experience alone and beside regarding course make you smarter than ever before. Yeah, it is very fortunated for you. The book makes you considerably more confidence because you can know anything by the book. So , let us make new experience along with knowledge with this book.

#### **Elizabeth Branch:**

People live in this new day time of lifestyle always make an effort to and must have the spare time or they will get lots of stress from both lifestyle and work. So , once we ask do people have extra time, we will say absolutely indeed. People is human not really a robot. Then we ask again, what kind of activity do you have when the spare time coming to you of course your answer will probably unlimited right. Then do you try this one, reading publications. It can be your alternative inside spending your spare time, typically the book you have read is usually Protein Surface Recognition: Approaches for Drug Discovery.

#### **Frank Ouellette:**

This Protein Surface Recognition: Approaches for Drug Discovery is great e-book for you because the content which is full of information for you who always deal with world and still have to make decision every minute. This particular book reveal it data accurately using great plan word or we can claim no rambling sentences in it. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but difficult core information with splendid delivering sentences. Having Protein Surface Recognition: Approaches for Drug Discovery in your hand like getting the world in your arm, data in it is not ridiculous one particular. We can say that no reserve that offer you world with ten or fifteen small right but this e-book already do that. So , it is good reading book. Hi Mr. and Mrs. occupied do you still doubt in which?

#### **Cesar Ford:**

What is your hobby? Have you heard this question when you got learners? We believe that that problem was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And you know that little person such as reading or as examining become their hobby. You need to understand that reading is very important and book as to be the point. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You see good news or update with regards to something by book. Many kinds of books that can you take to be your object. One of them is niagra Protein Surface Recognition: Approaches for Drug Discovery.
