The Biology of Deserts (Biology of Habitats) David Ward

This book offers a concise but comprehensive introduction to desert ecology and adopts a strong evolutionary focus. As with other titles in the *Biology of Habitats Series*, the emphasis in the book is on the organisms that dominate this harsh environment, although theoretical and experimental aspects as well as conservation and desertification are also considered

Deserts are defined by their arid conditions; a consequence of this aridity is that most of the area occupied by desert is barren and monotonous, leading many people to regard it as wasteland. However, deserts are widespread and represent surprisingly biodiverse environments, although it is the relative simplicity of these ecosystems that makes them more tractable for study than more complex environments. In these resource-poor locations, natural selection is working at its most extreme and provides some of the best-known examples of Darwinian selection.

The Biology of Deserts includes a wide range of ecological and evolutionary issues including morphological and physiological adaptations of desert plants and animals, species interactions, the importance of predation and parasitism, food webs, biodiversity and conservation. It features a balance of plant and animal (both invertebrate and vertebrate) examples, and also emphasizes topical applied issues such as desertification and invasive species. The book concludes by considering the positive aspects of desert conservation.

Each of the books in the Oxford *Biology of Habitats Series* introduces a different habitat, and gives an integrated overview of the design, physiology, ecology, and behaviour of the organisms found there. The practical aspects of working within each habitat, the sorts of studies that are possible, and habitat biodiversity and conservation status are all explored.

From reader reviews:

Gary Lane:

Have you spare time for any day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to the actual Mall. How about open as well as read a book eligible The Biology of Deserts (Biology of Habitats)? Maybe it is being best activity for you. You recognize beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with it has the opinion or you have some other opinion?

Maria Vanness:

As people who live in typically the modest era should be upgrade about what going on or info even knowledge to make these keep up with the era that is always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice for you personally but the problems coming to you actually is you don't know what kind you should start with. This The Biology of Deserts (Biology of Habitats) is our recommendation to help you keep up with the world. Why, since this book serves what you want and wish in this era.

Elaine Roberts:

The feeling that you get from The Biology of Deserts (Biology of Habitats) is a more deep you excavating the information that hide into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to be aware of but The Biology of Deserts (Biology of Habitats) giving you excitement feeling of reading. The author conveys their point in certain way that can be understood by simply anyone who read that because the author of this book is well-known enough. This specific book also makes your own vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this kind of The Biology of Deserts (Biology of Habitats) instantly.

Marilyn Leonard:

Do you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you just dont know the inside because don't ascertain book by its handle may doesn't work at this point is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer may be The Biology of Deserts (Biology of Habitats) why because the excellent cover that make you consider about the content will not disappoint you. The inside or content is actually fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.
