Packed with illustrations and examples, this book will make the task of improving your Seam application simple and straightforward. This book is for Java EE application developers who have a Seam web application set up and ready to go, and are looking for information on the key areas of Seam that this book covers. You will need a basic understanding of Java EE and also to be aware of EJB3, although you do not need to know it in any detail. Experience with JBoss AS would be great, but all you really need is to be comfortable using any application server. Knowledge of AJAX and JavaScript would also be beneficial, although it is not necessary.
