## Worlds Apart: Globalization And The Environment

*Worlds Apart* presents a cohesive set of essays by leading thinkers on the subject of globalization, offering a thoughtful overview of the major environmental issues related to globalization in a clear, reasoned style. Framed by Gus Speth's introduction and conclusion, essays range from Jane Lubchenco's discussion of the scientific indicators of global environmental change to Robert Kates' examination of the prospect that our growing global interconnectedness could lead a transition to a more sustainable world to Vandana Shiva's impassioned plea for a new "living democracy" that counters the degrading, dehumanizing tendencies of the global economy. Other contributors include Maurice Strong on the Rio Earth Summit and the future course of environmentalism, Jose Goldemberg on energy, Jerry Mander on the inherent destructiveness of the global economic system, Stephan Schmidheiny on the forestry industry, and Daniel Esty and Maria Ivanova on global environmental governance.

Edited by one of the world's leading experts on international environmental issues, the book brings together the most respected thinkers and actors on the world stage to offer a compelling set of perspectives and a solid introduction to the social and environmental dimensions of globalization.
